# KEY FACTS

Hart & Co is an Accredited Independent Fabricator. We've been audited with our supply Partners, REHAU & SE Controls to produce smoke vents which comply with EN12101-2 System 1 fabrication.

The benefits of using a tested solution include:

- **You'll receive a Declaration of Performance (DOP) to demonstrate compliance.**
- **Free air calculations.**
- **CE marked product.**
- **Product rigorously cycle tested for reliability & operation at 300 degrees.**

**EN12101 dictates that an opening smoke vent is in itself a unique product which can only be CE marked if it meets certain criteria. The vent profile and actuator need to be tested together to comply with EN 12101-2 at an accredited testing facility.**
